The ROYAL HYBRID
The DEVIL'S BRIDE

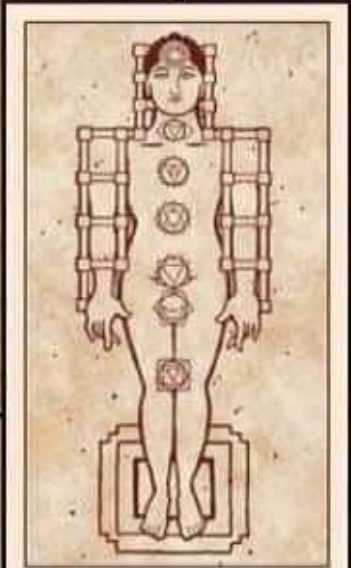

TEMPLE AS BODY

Searching for a connection to the world outside ourselves and beyond, we have used the human body to understand the pattern of creation from the beginning of time. Architecture has always been an intermediary for expressing our connection to the cosmos—matching the mystery of our own bodies to the mysteries of the universe helps us better understand both.

BODY AS TEMPLE

This diagram is an extension of the temple plan on the left. The numbers on the body correlate to those on the different sections of the building plan. The correspondences are similar to Eastern Chakras, but instead of energy centers, the parts of the temple relate to parts of the body that sense or are similar to the function of the temple objects they refer to.

EAST MEETS WEST

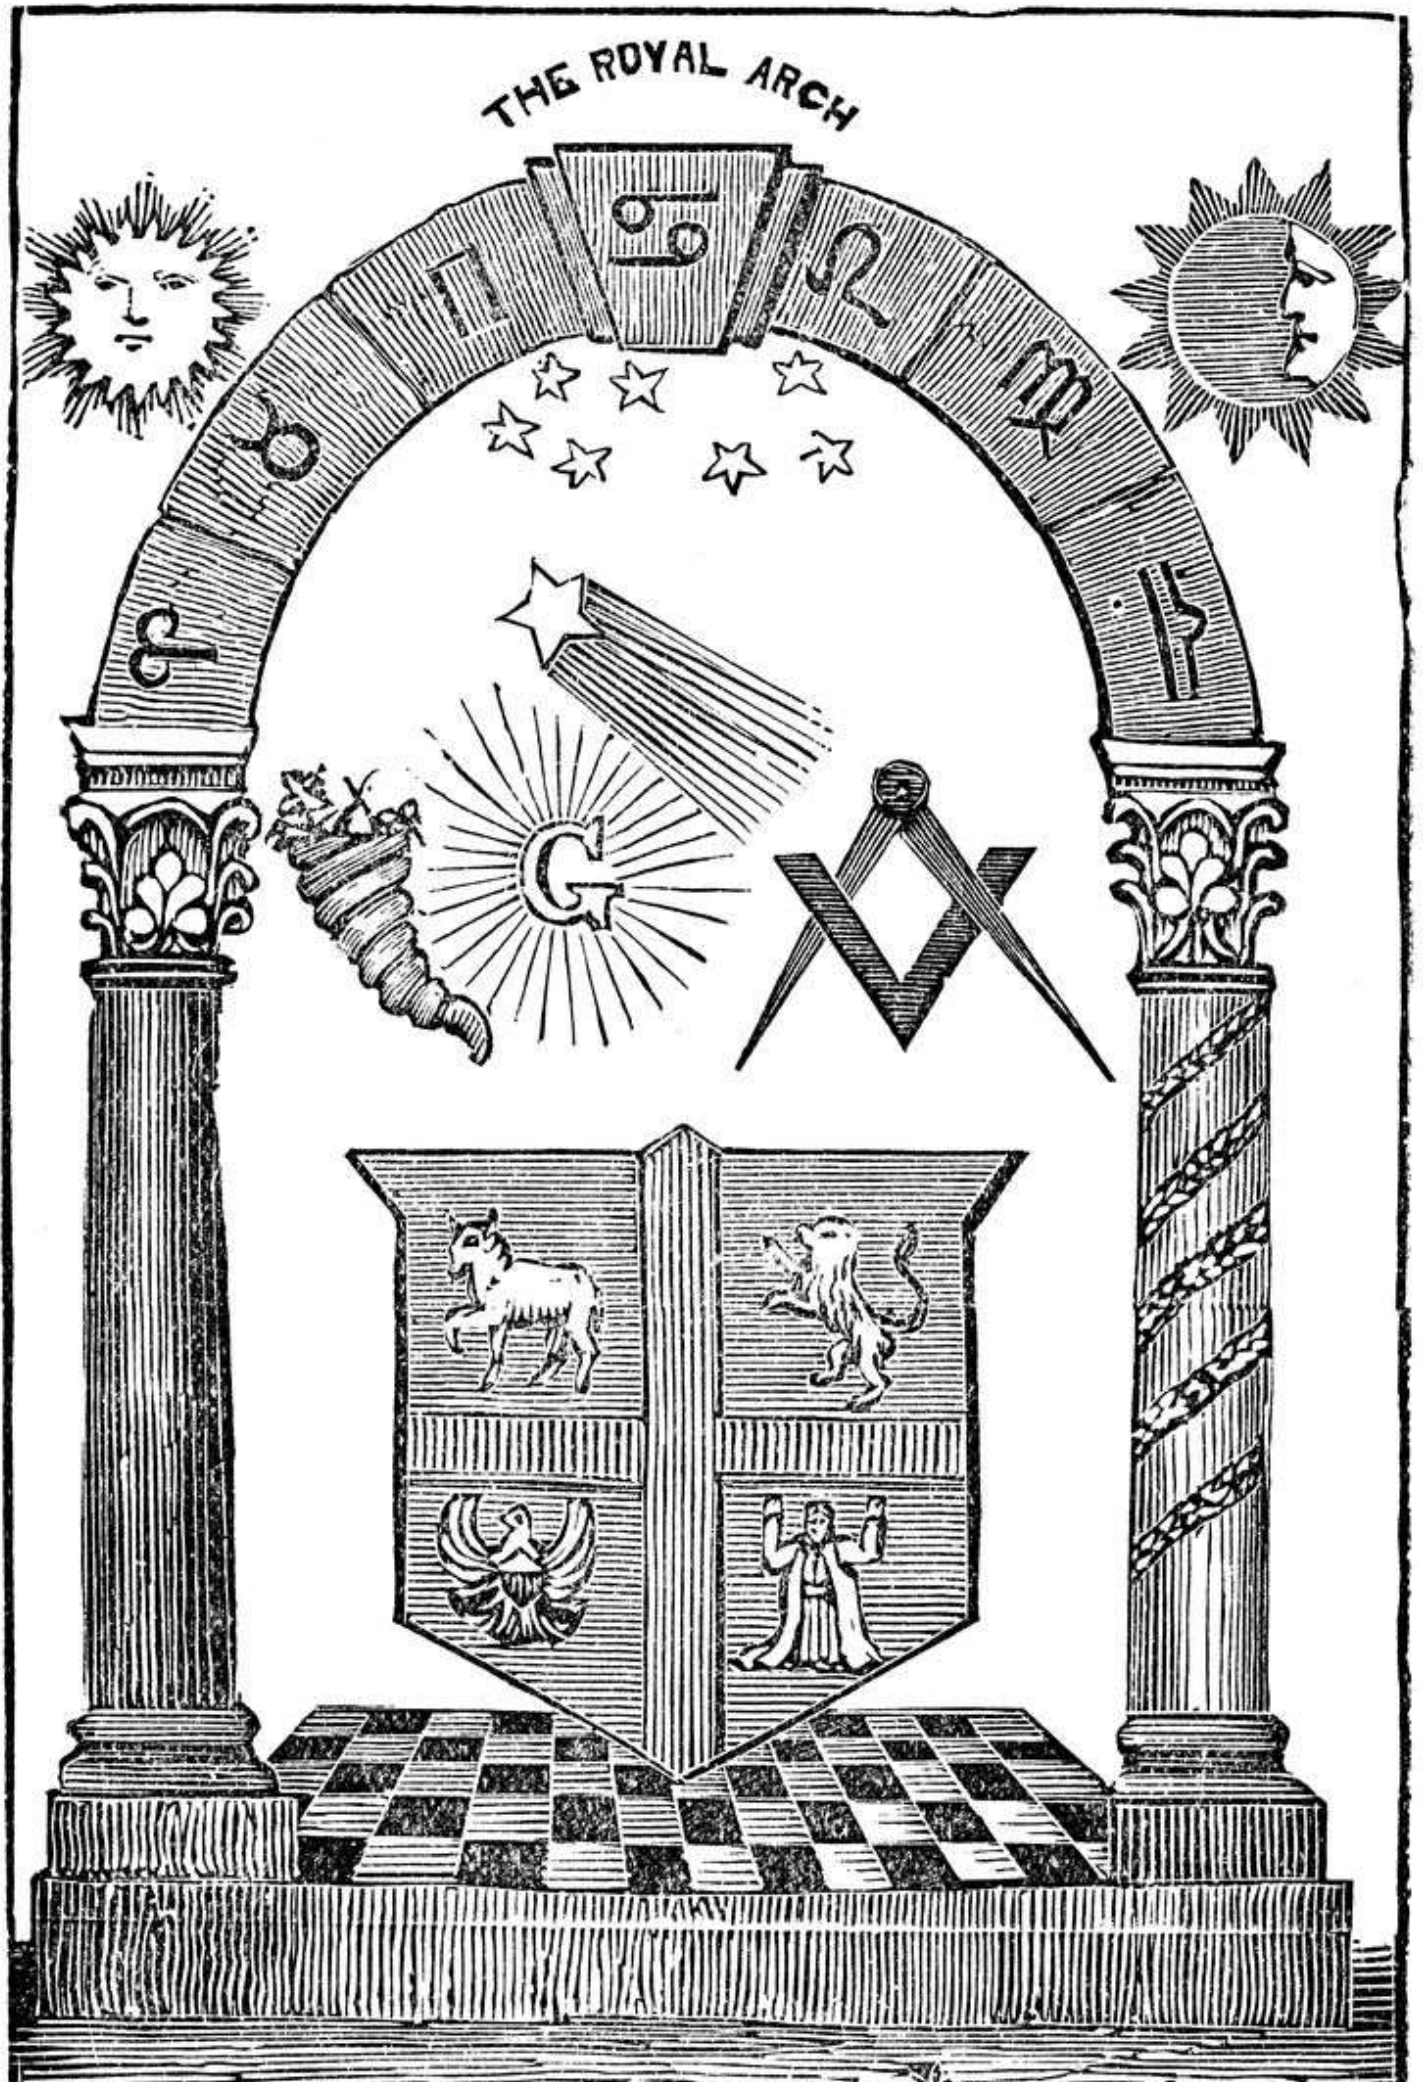

This Indian temple plan shows how many ancient Hindu sites translated the human body into architecture to create a symbolic representation of the cosmos.
